EDUCATION

University of Iowa

Bachelor of Science in Engineering - Electrical Engineering

May 2025

Focus Area: Computer Science

Related Coursework: Fundamentals of SWE, SW Design, DSA, Comm. Networks, Generative Artificial Intelligence

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, C#, HTML/CSS/JSX/TSX/PHP, Julia, MATLAB

Frameworks/Tools/IDEs: Bash, Vim, Git, Next.js, React/React Native, Expo, Node.js, AWS

OS: MacOS, Linux (Kali Linux, Ubuntu, Debian), Windows

WORK EXPERIENCE

Outsider - Full Stack Developer

Dec 2024 – June 2025

- Spearheaded the development of a mobile social media app using React Native, Expo, Tailwind CSS, Supabase; built core features resulting in a functional MVP within 6 weeks
- Took initiative in leading a 3-person development team, establishing sprint based workflows and managing task delegation via weekly planning meetings, which improved development efficiency by 40%
- Established standardized development workflows to improve team consistency and code quality resulting in fewer merge conflicts and a smoother sprint cycle
- Integrated Supabase for user authentication/management and storage, enabling real-time sync and simplified backend

Firefly - Engineering Technician Intern

Chicago, IL

Mar 2022 – Aug 2022

- Gained expertise in firmware and hardware troubleshooting for digital billboards on taxis and rideshare cars
- Transformed Chicago branch performance from worst to best through effective repair strategies
- Led mass data collection and automation project using Python with OpenCV and Matplotlib to automate data entry
- Engineered efficient workflows resulting in 20% increase in daily fixed screens stressing diligence and organization
- Participated in Agile processes by contributing to weekly stand-ups and development sprints

Custom Craft Builders - Web Developer/Electrician's Assistant

Chicago, IL

May 2020 – Dec 2024

- Led daily teams to install low-voltage cables planning and executing coaxial and Ethernet cable routes
- Developed, deployed, maintained website (2020-2022) using HTML, CSS, JavaScript, and Bootstrap 5 framework
- Configured and managed AWS EC2 server hosting for the website, ensuring high availability and performance
- Implemented automated messaging features on the website, improving client engagement and communication

PROJECT HIGHLIGHTS

nibbleMate - Automatic Cat Feeder (C, React Native, Expo, PostgreSQL, Babel, Jest)

Dec 2024 – May 2025

- Built out cross platform web app that displays key insights of pet health with metrics collected from physical feeder
- Designed system architecture & PostgreSQL schema, created RLS policies, and implemented secure user authentication flow
- Implemented OpenAI's API to generate suggestions on how to meet user specified cat health goals

Electronic Voting System - Full Stack Web App

Sep 2024 – Dec 2024

- Architected and developed secure electronic voting platform using React frontend with PostgreSQL database backend
- Led 3 person development team through agile sprint methodology delivering working MVP within single semester
- Implemented authentication system with role-based access control for Admin, Manager, and Voter roles
- Architected modular React component library and implemented dynamic routing with React Router
- Established CI/CD workflows with automated testing using Babel-Jest & maintained code architecture with ESLint

Real-Time Message System (Raspberry PI, Arduino, JavaScript, Python, WebSocket, Node.js)

May 2020

- Real-time messaging system with filtering algorithm to process and playback messages through web interface

EXTRACURRICULAR ACTIVITIES & LEADERSHIP

CommUnity Food Pantry Volunteer.

Iowa City, IC

Apr 2024 – May 2025

- Prepared and stocked food shelves, organized and monitored food tickets, trash management

Marist Robotics - Software Captain

Chicago, IL

Jan 2019

- Orchestrated development of software for Vex Robotics competitions competing against Chicagoland area schools

Illinois Institute of Technology – Code camp

Chicago, IL

June – Aug 2018

- Led team developing Ninja parkour game displaying unique mechanics and physics using Unity and C#
- Runner up in one week game development competition
