EDUCATION

University of Iowa

Bachelor of Computer Science and Engineering

Expected May 2025

Focus Area: Computer Networks

Related Coursework: Embedded Systems, Data Structures, Communication Networks, Generative Artificial Intelligence

TECHNICAL SKILLS

Programming Languages: Java, C, C++, C#, Python, HTML/CSS/JS/PHP, Node JS, React JS, Express, MySQL, Julia, Processing.JS, MATLAB Adobe ExtendScript, Swift

Frameworks/Tools/IDEs: Bash, Vim, Git, AVR Assembly, Websockets, AWS, Micro-Cap Spice, SolidWorks, Atmel Studio, OpenCV, Matplotlib, FFmpeg, Numpy, TKinter, pyautogui, pytesseract

Microcontrollers: ESP 32, ATmega328p, AtTiny45, Arduino Uno, Arduino Nano, Raspberry Pi

OS: MacOS, Linux (Kali Linux, Ubuntu, Debian), Windows

WORK EXPERIENCE

Firefly - Technician

Chicago, IL

Mar 2022 – Aug 2022

- Gained expertise in firmware and hardware troubleshooting for digital billboards on taxis and rideshare cars
- Transformed Chicago branch performance from worst to best through effective repair strategies
- Led mass data collection and automation project using Python with OpenCV and Matplotlib to automate data entry
- Engineered efficient workflows resulting in 20% increase in daily fixed screens emphasizing diligence and organization
- Participated in Agile processes by contributing to weekly stand-ups and observing development sprints

Custom Craft Builders - Web Developer/Electrician's Assistant

Chicago, IL

May 2020 – Present

- Led daily teams to install low-voltage cables planning and executing coaxial and Ethernet cable routes
- Developed, Deployed, and Maintained a website (2020-2022) using HTML, CSS, JavaScript, and Bootstrap 5 framework
- Configured and managed AWS EC2 server hosting for the website, ensuring high availability and performance
- Implemented automated messaging features on the website, improving client engagement and communication

The Alley - Lead Bowling Alley Mechanic

Mokena, IL

Mar 2020 – Mar 2022

- Perform preventative maintenance and diagnostic troubleshooting to complex bowling lane machinery
- Ensured correct operation of pin cycle mechanisms, cleaning and tensioning pulleys, replacing gears
- Documented and ordered replacement components ensuring timely repairs and minimal downtime
- Mastered mechanical maintenance of large complex machinery while executing safety measures

PROJECT HIGHLIGHTS

Automatic Camera Man

Feb 2022

- Utilizes Python, OpenCV, Arduino, and Raspberry Pi for real-time color-based object detection and tracking
- Built system integrating Rasp. Pi/OpenCV for computing detection algorithm with Arduino for servo control

Real Time Message System (Raspberry Pi, Arduino, JavaScript, Python, websockets, NodeJS)

May 2020

- Real-time messaging system with filtering algorithm to process and playback messages through web interface

Datamosher

July 2024

- Using Python and FFmpeg to manipulate video encoding in a controlled manner to produce glitch art

Adobe After Effects Plugin

Jan 2024 – Mar 2024

- Designed plugin to automate video editing processes expediting traditional video editing workflow using JSX

CERTIFICATION

- AWS Cloud Practitioner Certification (In progress)

2024

EXTRACURRICULAR ACTIVITIES & LEADERSHIP

CommUnity Food Pantry Volunteer

Iowa City, IC

- Prepared and stocked food shelves, organized and monitored food tickets, trash management

April 2024 - Present

Marist Robotics - Software Captain

Chicago, IL

Jan 2019

- Orchestrated development of software for Vex Robotics competitions competing against Chicagoland area schools

Illinois Institute of Technology – Code camp

Chicago, IL

June - August 2018

- Led team developing Ninja parkour game displaying unique mechanics and physics using Unity and C#
- Runner up in one week game development competition
